Remove the outer sleeve of the APO-go® PEN and attach the needle.

Remove the protective cone, but do not throw it away. Replace the APO-go® PEN’s outer sleeve.

Press the red dosage dial and turn the dial clockwise until the arrow points to the prescribed dosage.

Pull the red dosage dial out and check that the scale on the plunger corresponds to the intended dose.

Insert the needle into the skin of the lower abdominal wall, or the outer aspects of the thighs.

To inject, fully depress the red dosage dial. Wait a few seconds before withdrawing the needle.

Inject into the skin of the lower abdominal wall, or the outer aspects of the thighs.
